

FISCAL NOTE

TO: Chief Clerk of the Senate
Chief Clerk of the House

FROM: James A. Davenport, Executive Director

DATE: March 11, 1996

SUBJECT: **SB 2908 - HB 2712**

This bill, if enacted, will allow local education agencies to permit an employee or volunteer to administer prescription medication and perform health care procedures. Currently, non-licensed persons who carry out such procedures are considered to be practicing nursing without a license by the Board of Nursing. The bill lists conditions to be met to allow the administration of medication but the person must be trained and follow procedures agreed upon by the Department of Health, Department of Education and Board of Nursing.

The fiscal impact on local governments from enactment of this bill in and of itself is estimated to be minimal since the provisions of the bill are permissive.

However, if local education agencies decided to train one person in each of the state's 1,554 schools the fiscal impact of this bill is estimated to increase local government expenditures by \$279,720 for the cost of six hours of training for each person. The fiscal impact is also estimated to increase state government revenues by \$279,720 to the Department of Health to provide the training.

This is to duly certify that the information contained herein is true and correct to the best of my knowledge.

James A. Davenport, Executive Director
